Antibiotic Guardian Challenge Crossword

Antibiotics are used to treat both humans and animals. We all need to work together: doctors, vets families, pet owners and farmers, to know how and when to use antibiotics without causing the spread of antibiotic resistance.

The Antibiotic Guardian campaign was launched to kick-start collective action from both members of the public and healthcare professionals across England.

By pledging to become an Antibiotic Guardian you choose to perform a simple action which protects antibiotics against the growing threat of antibiotic resistance.

Take these simple actions

- treat your cough, cold and flu symptoms with pharmacist advice and over the counter medicines
- take your antibiotic exactly as prescribed, never save them for later, never share them with others
- spread the word, tell others about antibiotic resistance and the antibiotic guardians

To help do your part to stop the spread of antibiotic resistance, choose a pledge at AntibioticGuardian.com. Your actions can help protect antibiotics.
