This Patient Group Direction (PGD) must only be used by registered health professionals who have been named and authorised by their organisation to practice under it. The most recent and in date final signed version of the PGD should be used.

Patient Group Direction

for the administration of

Aspirin 300mg soluble tablet

by registered Nurse for

Patients over 16 years of age with suspected myocardial infarction or acute coronary syndrome awaiting transfer to Accident and Emergency Department (A&E)

If aspirin is given before arrival at hospital a note saying that it has been given should be sent with the patient.

Version Aspirin PGD 2015 v1

## Training and competency of registered health professionals

<table>
<thead>
<tr>
<th>Requirements of registered health professionals working under the PGD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Qualifications and professional registration:Registered Nurse having valid registration with the Nursing and Midwifery Council (NMC) and working within Wirral CCG Unplanned Care Services and GP Practices. The nurse will have due regard for the NMC Code of Conduct, Scope of Professional Practice and Standards of Administration for nurses.</td>
</tr>
<tr>
<td>Initial training:</td>
</tr>
<tr>
<td>- Received training to undertake supply and administration of medicines under Patient Group Directions.</td>
</tr>
<tr>
<td>- Received specific training in the use of this PGD.</td>
</tr>
<tr>
<td>- The nurse should have achieved the competency levels specified in the NICE Competency Framework for Health Professionals using Patient Group Directions.</td>
</tr>
<tr>
<td>Competency assessment: Maintenance of own level of updating with evidence of continued professional development (PREP requirements).</td>
</tr>
<tr>
<td>Ongoing training and competency:</td>
</tr>
<tr>
<td>- Annual update on resuscitation skills and the management of anaphylaxis in the community.</td>
</tr>
<tr>
<td>- Able to provide evidence of continued professional development i.e. meeting Post-Registration Education &amp; Practice (PREP) requirements.</td>
</tr>
</tbody>
</table>
# Clinical condition

## Clinical condition or situation to which this PGD applies

Patients presenting with suspected acute myocardial infarction or acute coronary syndrome awaiting transfer to A&E

*This Patient Group Direction should only be used where there is no medical practitioner or nurse prescriber available to assess and treat the patient*

This is a medical emergency dial 999 for an ambulance

## Inclusion criteria

Patients presenting with severe central chest pain and other associated features of myocardial infarction or acute coronary syndrome who are adults over 16 years old with valid consent

## Exclusion criteria

- Children under 16 years of age
- No valid consent
- Haemophilia and other bleeding disorders
- Severe hepatic disease
- Active peptic ulceration or recent history of gastrointestinal bleed
- Breast feeding or pregnant women
- Known hypersensitivity to aspirin or other non-steroidal ant-inflammatory drugs (NSAIDs) e.g. asthma attacks precipitated
- Current treatment with anticoagulants eg warfarin, heparin,
- Has already been given an extra dose of aspirin 300mg for current episode (e.g. by other first contact service)
- Has received other thrombolytic drugs within the last 24 hours

## Cautions (including any relevant action to be taken)

- Patients already taking aspirin (except low dose 75mg)
- History of bronchospasm, asthma, renal or hepatic impairment
- Uncontrolled hypertension
- Previous history of haemorrhagic stroke
- Patients prescribed potentially interacting medication

## Arrangements for referral for medical advice

Immediate transfer to Accident and Emergency Arrowe Park Hospital.

Suspected life threatening condition needing appropriate treatment as soon as possible

## Action to be taken if patient excluded or declines treatment

If the patient is excluded or declines refer patient to Accident and Emergency Department (A&E) or medical practitioner immediately

Document action or refusal in patient's record.
# Details of the medicine

<table>
<thead>
<tr>

</tr>
<tr>
<td><strong>Maximum or minimum treatment period</strong></td>
<td>One dose only</td>
</tr>
<tr>
<td><strong>Adverse effects</strong></td>
<td>May cause nausea and vomiting. Other side effects include: Hypersensitivity reactions bronchospasm and gastric haemorrhage. This list is not exhaustive – refer to current BNF for a complete list. All suspected adverse reactions occurring in individuals of any age following administration should be documented and reported to the Medicines Healthcare products Regulatory Agency (MHRA) via yellow card system. <a href="https://yellowcard.mhra.gov.uk">https://yellowcard.mhra.gov.uk</a> The GP should also be informed and an incident form completed.</td>
</tr>
</tbody>
</table>
| **Records to be kept** | Record fully in Trust, clinical record / GP records and as required in parent held records.  
- Patient’s name and date of birth  
- Treatment given including dose and route of administration  
- Frequency of administration and duration of treatment  
- Date and time given  
- Brand, batch and expiry date of any products used  
- Signature and name of the person administering the medication  
- Consent obtained  
- Advice given  
- State PGD has been followed and record treatment plan in patient’s notes  
- An electronic or manual record of all individuals receiving immunisation under this PGD should be kept for audit purposes. |
If the patient consents, details of the consultation should be sent to their GP.

**Patient information**

| Information to be given to patient or carer | Importance of immediate transfer to Accident and Emergency Department, Arrowe Park Hospital and the need for appropriate treatment as soon as possible. Importance of passing on the note saying that a dose of Aspirin 300mg has already been administered to a member of the A&E team |
