

## ScriptSwitch User Interface Guide

The ScriptSwitch window may appear whilst prescribing:

When Displayed:

If there is more than one alternative offered, use the Shift plus  $\downarrow$  or  $\uparrow$  keys on the keyboard to select the preferred option.

Then choose the appropriate Action Button as described below:

- Accept Switch** to select the alternative offered. You will then be able to edit this item through the clinical system in the normal way.
- Edit Original** to return to the original prescribing window.
- Prescribe Original** to prescribe the original item.

To return to the current script, press **Escape** or **F1**.

To accept advice if available, press **Enter**.

### For technical support:

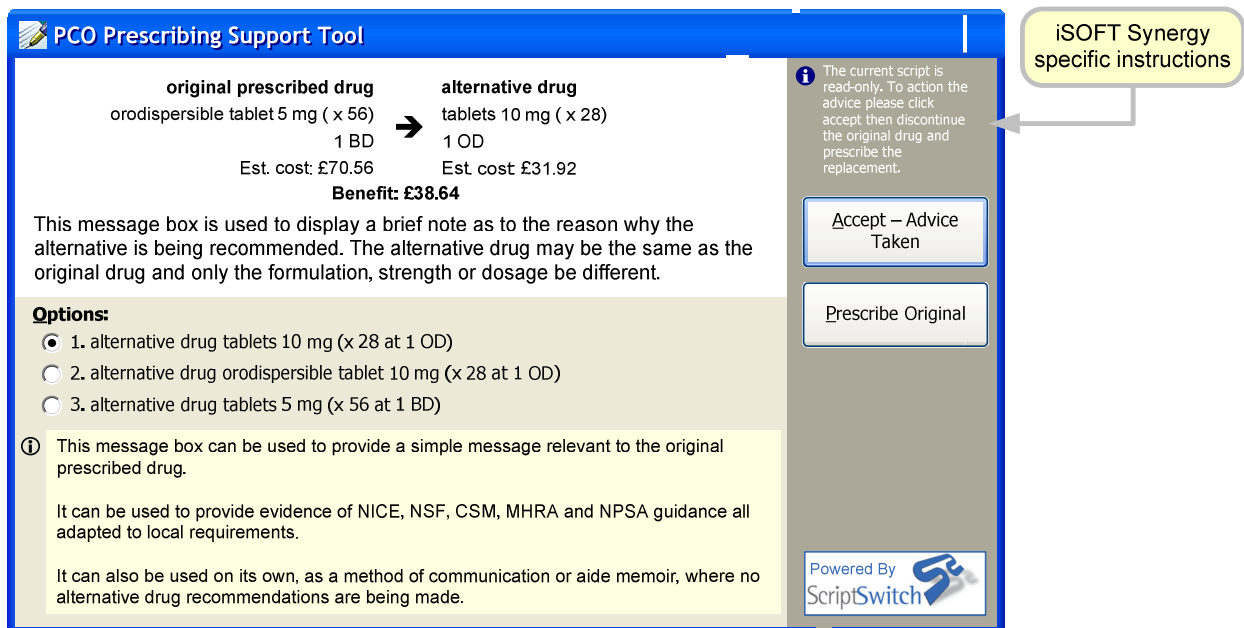

Email [support@scriptswitch.com](mailto:support@scriptswitch.com) or call Scriptswitch Customer Services on 02476 214 700

### For queries about prescribing recommendations:

Please contact your PCT or LHB Prescribing Team.

## iSOFT Synergy

For iSOFT Synergy users, the following screen may appear when the current script cannot be changed directly by ScriptSwitch:

**PCO Prescribing Support Tool**

original prescribed drug	alternative drug
orodispersible tablet 5 mg ( x 56) 1 BD Est. cost: £70.56	tablets 10 mg ( x 28) 1 OD Est. cost £31.92
<b>Benefit: £38.64</b>	

This message box is used to display a brief note as to the reason why the alternative is being recommended. The alternative drug may be the same as the original drug and only the formulation, strength or dosage be different.

**Options:**

- 1. alternative drug tablets 10 mg (x 28 at 1 OD)
- 2. alternative drug orodispersible tablet 10 mg (x 28 at 1 OD)
- 3. alternative drug tablets 5 mg (x 56 at 1 BD)

**iSOFT Synergy specific instructions:**

The current script is read-only. To action the advice please click accept then discontinue the original drug and prescribe the replacement.

**Action Buttons:**

- Accept – Advice Taken
- Prescribe Original

**Powered By ScriptSwitch**

When displayed:

If there is more than one alternative offered, use the Shift plus  $\downarrow$  or  $\uparrow$  keys on the keyboard to select the preferred option.

Then choose the appropriate Action Button as described below:

- a) **Accept – Advice Taken** to indicate the offered alternative has been accepted. This will then close the current script window without making any changes to the patient record. The original product can be discontinued and the offered alternative can be prescribed directly.
- b) **Prescribe Original** to prescribe the original item.

To return to the current script, press **Escape** or **F1**.
